PARTIES OF RECORD

Re: Case No. 2014-00371
Minutes of the Information Session and Public Meeting
Bryan Station High School
April 13, 2015

Attached is a copy of the memorandum summarizing the public meeting held April 13, 2015 in Lexington, Kentucky, which is being filed in the record of the above-referenced case. If you have any questions, please contact Jonathan Beyer, Staff Attorney, at 502-782-2581.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jeff Derouen".

COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

APPLICATION OF KENTUCKY)	CASE NO.
UTILITIES COMPANY FOR AN)	2014-00371
ADJUSTMENT OF ITS ELECTRIC)	
RATES)	

MINUTES OF THE INFORMATION SESSION AND PUBLIC MEETING
BRYAN STATION HIGH SCHOOL
LEXINGTON, KENTUCKY
April 13, 2015 5:30 P.M.

A public information session and public meeting was held at Bryan Station High School in Lexington, Fayette County, Kentucky on April 13, 2015. Andrew Melnykovich, Director of Communications for the Public Service Commission, conducted the information session introducing the Commission and Commission Staff, and explained the procedure and protocol for the information session and the public hearing. Mr. Melnykovich then presented an overview of the legal basis, criteria and review process for the Commission's consideration of applications for proposed rate increases. The presentation included a general overview of the instant application, explained which aspects of this case are within the Commission's jurisdiction, and concluded with a question-and-answer period with Commission Staff.

At the conclusion of the information session and after a short intermission, Vice-Chairman Jim Gardner initiated the public hearing portion of the meeting, providing a brief overview of the case at bar, the parties involved, and setting forth the procedure and protocol for the taking of comments. Vice-Chairman Gardner then invited the public

to make comments to the Commission regarding Kentucky Utilities Company's ("KU") application for an adjustment of rates. The following individuals spoke at the public meeting:

1. Ramesh Bhatt: Mr. Bhatt spoke on behalf of the local members of the Sierra Club. He read a written statement, which he also provided and is attached to this memorandum. Mr. Bhatt set forth his opposition to the proposed increase in base rates on the basis that it will harm energy efficiency. He specifically alleged that placing the increase largely on the customer charge will result in a 2.5 percent increase in energy consumption. He also expressed concern regarding the impact on energy diversification and the economic effect.
2. Cara Cooper: Ms. Cooper spoke to protest and express her belief that the proposed rate increase is unfair.
3. Tyler Offerman: Mr. Offerman indicated his interest in reducing waste and stated that the proposed increase in the customer charge incentivizes waste and creates a disincentive to conserve energy.
4. Mary Ann Ghosal: Ms. Ghosal spoke on behalf of her intentional community, which recently expended approximately \$16,000 in solar equipment. She contended that the increase creates a penalty against those interested in the environment, as well as individuals on a fixed income and that encourages individuals to use more fossil fuel.
5. Jack Barnett: Mr. Barnett expressed his concern regarding fixed versus variable costs. He opined that the proposed rate structure is contrary to

conservation. He asserted his willingness to pay his share of the fixed costs related to his service; however, he stated that the nationwide average fixed cost to serve a customer is \$6. Finally, he stated that the proposed increase to the customer charge is in opposition to KU's purported interest in supporting its Demand Side Management programs.

6. Heather Wacaren: Ms. Wacaren stated that she has expended approximately \$15,000 in energy efficiency measures and that the proposed increase to the customer charge would largely negate her savings. She opined that efficient consumers are in effect subsidizing heavier users.
7. Jim Kimbrough: Mr. Kimbrough spoke in his capacity as the president of the Kentucky chapter of the AARP. Mr. Kimbrough stated that many of AARP's members are on social security and that the proposed rate increase would consume approximately half of this year's increase in social security payments. He noted that the Commission has historically granted utilities a lesser amount than they request in a base rate proceeding. However, he proposed that instead of authorizing a lower increase, the Commission outright deny the proposed increase so as to encourage the utility to submit a more reasonable request in the future.
8. Logan Poteat: Mr. Poteat is employed by the Lexington-Fayette School District. Mr. Poteat stated that if approved, the proposed rate adjustment would increase the school district's yearly electric bill by approximately \$850,000, which is equivalent to approximately twenty-two teacher's

salaries. He suggested that a school time-of-day- or school general service rate be explored.

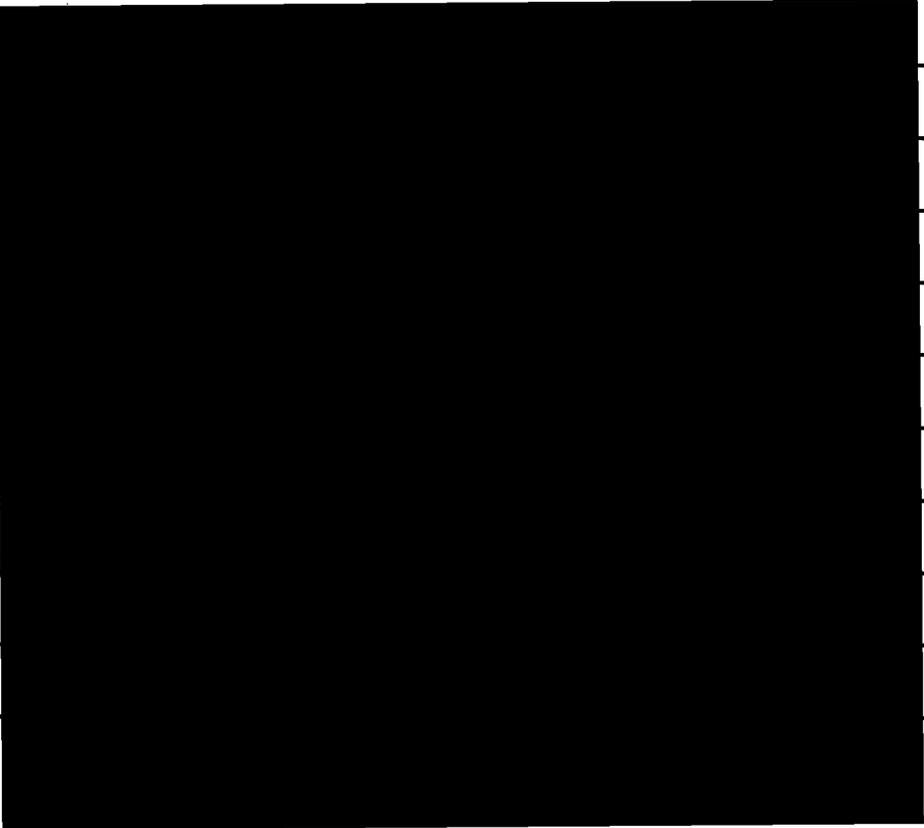

No other member of the public wished to make a comment. The public hearing was then adjourned. All persons in attendance were asked to sign in and provide their home address for the record. The sign-in sheet, the written statement of Mr. Bhatt, a petition tendered by Mr. Bhatt and petitions submitted by AARP are attached hereto.

Petition Opposing Kentucky Utilities Rate Restructuring

KU wants to **significantly raise your monthly fixed billing charge**, which will adversely affect low and fixed income customers, as well as customers who have made energy efficient improvements to their homes such as improving insulation, upgrading windows, adding efficient light bulbs or solar panels, and upgrading appliances. In other words, KU's proposal raises revenue at the expense of its most vulnerable and responsible customers. The utility has filed with the Public Service Commission to **raise the monthly fixed charge more than 67%**. [PSC Case 2014-00371] This rate restructuring plan discourages **energy conservation** and **homeowner investments in clean energy**. It affects customer choice and savings power by reducing the returns on their investments in energy efficient home improvements and renewable energy.

This also results in restricting the **growth of clean energy industries—like solar and energy efficiency**—just when Kentucky needs the jobs from those promising industries the most. The effects of climate disruption (heat waves, polar vortexes) are already affecting Kentuckians. We should be encouraging clean renewable energy, not creating barriers to consumer choice and job creation. We must begin to employ clean, carbon-free electric generation to reduce the impacts of global warming. Homeowner solar systems are one of the best carbon-free technologies for Kentucky to encourage. Efficiency is the lowest-cost way to reduce our use of fossil fuels quickly.

With the belief that efficiency and clean energy should not be discouraged or punished, I hereby sign this petition.

We, the undersigned, call on KU to keep the fixed monthly charge small and unchanged!

STATEMENT ON KU's RATE RESTRUCTURING PROPOSAL (PSC Case 2014-00371)

Ramesh Bhatt

Bluegrass Group of the Sierra Club

I am speaking on behalf of the approximately 1500 members of the Bluegrass group of the Sierra Club. We strongly oppose the latest proposal from KU to increase electricity rate for residential customers.

KU's proposal will transfer costs from high energy users to low energy users, discourage energy efficiency, and disproportionately impact the poor and those living on a fixed income.

The proposal to increase the flat fixed monthly charge by 67% from \$10.75 to \$18 per month, if implemented, will definitively hurt fixed income customers. It is especially problematic now, given the generally poor economic health of many people in Central Kentucky. Unfortunately, KU dismisses the increase as merely costing pennies a day without considering that the base rate translates into over \$130/ year, which is a substantial burden on somebody on a fixed income.

We also oppose the increase in the base rate because it will hurt energy efficiency. Paul Chernick, former utility analyst for the Massachusetts Attorney General and an expert on energy efficiency, estimates that such an increase will result in approximately 2.5% increase in energy consumption just because of the nature of disincentive for efficiency built into the request. In other words, in comparison to a system with proportionately smaller base rates and higher per kwh rates, the dramatic increase the base rate proposed by KU will result in an increase in energy use. This will stymie energy efficiency efforts in our state just when they are urgently needed. For decades now, the PSC has argued for energy efficiency. For example, the PSC stated the following in 2012:

For over 30 years, the Commission has historically noted the importance of energy efficiency (conservation) as a ratemaking standard¹. ...

In recent years the Commission has emphasized the importance of energy efficiency ... in conjunction with a requested increase in the customer charge.²

Please, DO NOT make a decision now that will seriously discourage residential energy efficiency! It is time to take a stand and deny the rate structure that is guaranteed to work against energy efficiency.

The increase in base rates will also set back attempts to diversify our energy sources. In the United States today, more workers are employed in the solar industry than in the coal industry. Of course, we don't see this here in Kentucky. One reason for that is the lack of proper incentives. The KU proposal to increase base rates will be another obstacle in the path of solar and other sustainable technologies because customers who adopt cleaner energy sources while connected to the grid, such as solar panels on their roofs, will suddenly see a dramatic decline in cost savings due to the large increase in the base rate.

¹ Order, Case No. 2012-00221, December 20, 2012, pp. 7

² Order, Case No. 2012-00221, December 20, 2012, pp. 8.

In conclusion, KU's rate restructuring proposal will hurt fixed income customers, discourage energy efficiency, and inhibit customers from investing in clean technology like rooftop solar installations. Please REJECT IT! If you determine that additional revenue is indeed needed by KU, please increase the kwh energy charge, especially for heavy users of electricity. This will protect low-income customers and those who are frugal in their energy use.

Thank you.

Sincerely,

Ramesh Bhatt

**Statement of Jim Kimbrough, AARP Kentucky State President
Regarding Requested LG&E/KU Rate Increases (Case Numbers 2014-00371 and 2014-00372)
April 13, 2015**

My name is Jim Kimbrough, and I am the State President of AARP Kentucky, which has approximately 460,000 dues-paying members in Kentucky, a significant number of whom are on fixed-incomes, with many of them living exclusively or close to exclusively on their monthly Social Security benefits check. Beginning with this past January's payment, Social Security recipients received a 1.7% increase over the previous years' payment. The average monthly payment for 2015 is \$1328.

We have members in every county in the Commonwealth, so we represent utility customers who will be impacted if any rates are allowed to be increased by either KU or LG&E.

If approved by the PSC, the increases requested by LG&E and KU will make a considerable impact on all Kentuckians, but it will be disproportionately harmful to many of the Kentuckians that I am speaking for. A monthly increase in one necessary expense of \$18 (for an average residential electric bill) or \$19 (for residential gas services) means other necessary, vital purchases such as for food and medicine will be reduced. When you live on a fixed income, from the current Social Security check to the next Social Security check, with little savings available, the level of these two utilities requested increase is truly harmful. And the ripple effect from the requested increases to commercial customers will be also ultimately be felt in higher consumer prices for goods and services our members purchase in groceries, drug stores, and other retail establishments, since there will be an undeniable multiplier effect if these rates are increased.

AARP Kentucky urges the Commission to not just adjust downward these two requested rate increases, but to reject them outright, and cause KU and LG&E to recalculate and resubmit in the future far more realistic requests that take into account the real-world economic conditions that their customers live in.

I thank the Commission for its consideration of this request to deny these two cases.

--- Jim Kimbrough
State President
AARP Kentucky

KU AND LG&E ARE ATTEMPTING TO RAISE YOUR RATES

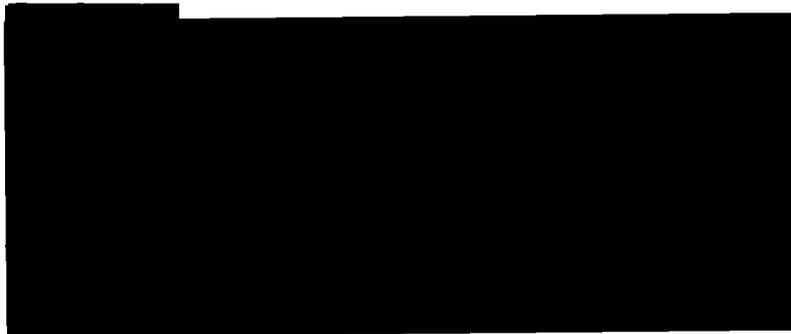

Say "NO" to Unfair Utility Bill Increases!

Right now, in your area KU and LG&E is asking the Kentucky Public Service Commission to allow them to raise your utility bills by more than \$96 for your electric meter rate or \$96 a year for your gas meter rate. If successful, KU and LG&E will raise your electric meter rates by \$8 a month or your gas meter rate \$8 a month on top of raising your electric rates 2.7%. **You can help stop this Rate Hike by simply filling out this petition.**

Completed petition submitted by Louisville Gas & Electric or Kentucky Utilities customer in response to cases 2014-00372 or 2014-00371.

I feel that this increase is way out of line. If you look at the CEO's salary and bonuses, it is obvious that some of this money could come from a reduction in his income. I have a Bachelors degree and a masters and am unable to find employment. I know MANY people in my situation. I would be satisfied with a job right now! To look for people like me to pay these increases is ridiculous!

I live in an apartment with less than 1000 square feet. It's well insulated and has double pane windows which are new. Rarely turn heat past 70 degrees. All electric. Just my disabled husband, my disabled sister and I. Finances are a little tight. Don't use a lot of electric, just the normal to cook, wash and dry clothes, TV. On KU, which used to be reasonable. \$80-\$100/ month. This winter I haven't had a bill under \$140, usually more. And I use less electric the last couple of years than I did the first 11 years I lived here. So seems to me they've had enough increases.

These "small" percentage increases add up every year for retired folks on a fixed income. I work to conserve and my bills were almost \$400 during the cold months. Before the increases they were in the \$200s, so your yearly increases become 100% in no time. LG&E needs to look within to learn how to conserve. For years you should have seen new regulations coming and should have planned accordingly. I would like to see one or all executives there try to pay their electric bill living on \$1500 per month which is what many people are forced to do. Medications or heat? Food or heat? This is just wrong.

I have been paying LG&E 43 years. It is time to stop increasing our rates. We had new windows installed five years ago and it saved on our utility bill, but with the increases we are now back to where we were. We turn down thermostat and dress warm to save on monthly bill. LG&E's continuous increase is hurting the middle and lower income households. Looking like our next option will be a wood burning stove.

Have you had expensive utility bills lately? Are you tired of your rates increasing?

Right now KU and LGE are asking the Kentucky Public Service Commission to allow them to raise your utility charges. If successful, they will raise your electric meter rates by \$7.25 to \$18 a month and/or your gas meter rate from \$13.50 to \$19 a month, as well as raising your energy usage charge. You can help stop this Rate Hike by simply filling out this petition.

Virginia Anggelis
[REDACTED]

The proposed rate hikes are unconscionable. My parents passed away within 45 days of each other in early 2013. Like so many elderly individuals, they were living on a fixed income. The bills were exorbitant and did not reflect the electric usage. More to the point, the house has been vacant since January 1, 2015. I called KU and LGE to ensure I was taking the necessary steps to have the bills reflect the actual usage. I was instructed to unplug all the appliances, make sure the fan was not on auto. and any , and I quote" unplug all stuff that uses electricity". I was also advised to keep the temperature on 45 or 50degrees to prevent frozen pipes. I followed all these instructions. The bills since January 1st of 2015 have been higher than those when the house was occupied. I have contacted KU numerous times to question this and have received no substantive answers. Therefore, I see this rate increase as another unilateral decision of KU and poor customer service.

KU AND LG&E ARE ATTEMPTING TO RAISE YOUR RATES

Have you had expensive utility bills lately? Are you tired of your rates increasing?

Right now KU and LGE are asking the Kentucky Public Service Commission to allow them to raise your utility charges. If successful, they will raise your electric meter rates by \$7.25 to \$18 a month and/or your gas meter rate from \$13.50 to \$19 a month, as well as raising your energy usage charge. You can help stop this Rate Hike by simply filling out this petition.

Completed petition submitted by Louisville Gas & Electric or Kentucky Utilities customer in response to cases 2014-00372 or 2014-00371.

Why are the utilities never denied a rate increase? I know they are never granted their whole request but i'm sure they have figured out they need to ask for more than they really want. I am more upset with the PSC than I am with the utilities. I think it is time we take a close look at who sits on the throne of the PSC. Maybe it is time to dethrone them !!!

This steep of hike will place an undo hardship on those with fixed incomes. This is nearly doubling the rates while salaries, Social Security, etc. have not been significantly increased for several years. It is hard to see how this large of an increase can be justified given the steep decline in the cost of production based on declining costs of natural resources. Seems like corporate greed run rampant.

[REDACTED]

THERE is no logical reason to allow an added fee increase when inflation is non-existent or has been that way since prime interest has been or is at almost been zero. Further, there had been no improvements in power distribution, or execution of these TO ME OR SNY OTHER CUSTOMER, to allow for recovery of these costs, when they are where they are. Lastly, it would be nice if every company, person, or entity could step out on their back stoop and yell. WE are raising our fees due to, hum, huh, hum what was that Mr. CFO the requestor says, how did we hustify that again? WHATEVER the reasoning, if KU IS MAKING A PROFIT OR RVEN BTEAKING EVEN, BEYOND THEIR EXPENSES NOW, WHY BESIDES GREED IS THIS NEEDED? VICTOR KING - POWER USER OF KU

Sounds like large corp again getting greedy. The consumer will be affected within their own household and then the buck will be passed along to the consumer again as the business will have to forward their costs onto their customers. I feel that I currently pay more than enough for my usage. Who is out there protecting the little guy. Times are tough and KU and LG&E are just thumbing their noses. I am sure they have a high profit line now and they need to get their hands smacked for trying to grab more.

I got a \$14 increase on my Soc Sec check. I live in Nicholasville where we pay KU for the use of there electric. These winter bills took a third of my check. It was a \$40 charge for the use of there lines. I feel like Im being crucified. I think when my lease is up I'll have to move where there's public transpotation & the cost of living is cheaper. Too many bills here. I've lived here 7yrs & its horrible the no help you get in N'ville, single Seniors have nothing.

Say "NO" to Unfair Utility Bill Increases!

Right now, in your area KU and LG&E is asking the Kentucky Public Service Commission to allow them to raise your utility bills by more than \$216 for your electric meter rate or \$228 a year for your gas meter rate. If successful, KU and LG&E will raise your electric meter rates by \$18 a month or your gas meter rate \$19 a month. **You can help stop this Rate Hike by simply filling out this online petition.**

Completed petition submitted by Louisville Gas & Electric or Kentucky Utilities customer in response to cases 2014-00372 or 2014-00371.

Susan Zander

Our utility rates in this area are already the highest I've ever paid in the states I've lived: WA, OR, TN and WI. My 86 year old relative lives with me because he can't afford the cost of living in his own home anymore on his retirement pensions and social security. And the cost of utilities consumes a big portion of our income. Surely there are efficiencies that could be enacted that would make rates more affordable.
